# CLINICAL STUDIES

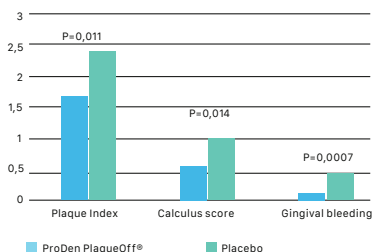

## ProDen DentalCare® Powder

ProDen DentalCare® Powder containing A.N ProDen™ efficiently and significantly decreased plaque and calculus accumulation as well as gingival bleeding. Based on the results of these studies, ProDen DentalCare® Powder was awarded VOHC approval.

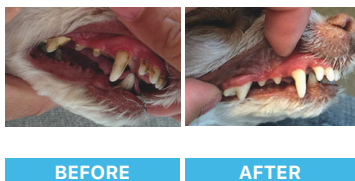

### For Dogs

Figure 1. Influence of ProDen PlaqueOff® on plaque, calculus and gingival bleeding, results from study 2\*.

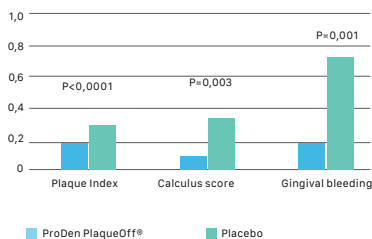

\* Scan QR on the back for more information.

After 30 days of oral administration, ProDen DentalCare® Powder for Dogs significantly reduced the accumulation of plaque and calculus as well as reduced the gingival bleeding index. The mean reduction was 32% (plaque index), 35% (calculus index) and 67% (gingival bleeding index).

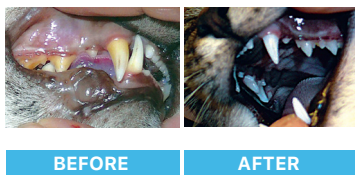

### For Cats

Figure 1. Influence of ProDen PlaqueOff® on plaque, calculus and gingival bleeding, results from study 1\*.

\* Scan QR on the back for more information.

After 30 days of oral administration, ProDen DentalCare® Powder for Cat significantly reduced the accumulation of plaque and calculus as well as reduced the gingival bleeding index. The mean reduction was 37% (plaque index), 67% (calculus index) and 61% (gingival bleeding index).
